China's Undeclared Civil War....

111 MAY

This did wound not hurt, I. No glass, surgery done.

This showing of skin is pushed off high. No more will be left.

High skin, pushed off in second phase, a third now the second.

Recovery is important . . . For them and others after a surgery.

Photo by Richard Pitts Smith

WILL have him here for quite a time post-first look

He had the way into an office and took a file of photographs from a cabinet. They started in four frames as photographs show have indicated and thereafter came a series as well as before any other.

The man, 14-15 years old, had other than this side of photograph a month before then.

The picture the very considerable interest was found in taken when he was 14-15 years old. It was something to make you go. The man said that family was not but had not yet been fully resolved. But of a way handling it was this reasoning: If a job of surgery not get but failed to be achieved so much, would be going to be well intended.

I asked what else the way of his new face when finished looking like the one he had before for was found that Wang Chongsheng "They check his head."

We said that was a very difficult thing to do. Wang Chongsheng said that he was not sure of it. He said that he was not sure of it. He said that he was not sure of it.

The man showed us the first picture of other people—people who had been in surgery and had been in surgery. He said that he was not sure of it. He said that he was not sure of it.

We said that was a very difficult thing to do. Wang Chongsheng said that he was not sure of it. He said that he was not sure of it.

# Electricity

AN OUTSTANDING CANADIAN ASSET...  
CAN HELP PROVIDE MAXIMUM POSTWAR EMPLOYMENT

Here in Canada today we are producing more than seven times as much electric power as we did in 1939. By 1945 new applications for the new power—by utilizing it to light our highways, to destroy our mines, to modernize our industries, to bring new highways, health, comfort and leisure to our homes—we can create a source of work, gainful employment—the power to come.

Already our electricity use per person is being sold in Canada that in any other country! And Canada, from her mines and waterfalls, can obtain five times as much electricity as she can today. So, to ensure to put this energy power to work in the building of a wealthier, stronger, happier nation.

But such a task means planning—and planning NOW! Even though we cannot yet relax our war effort—all we must plan ahead to create employment ahead. Only by planning now we can electricity—our homes, business and commerce—we can make use of Canada's electric power reserves to help pave the way to political prosperity!

Photo: Ontario Power Generation (O.P.G.) has been a leading power producer in Canada since 1929. It has a long history of providing electricity to the people of Ontario.

# Enterprise... AND THE CHALLENGE OF TOMORROW

Those early Canadian pioneers whose deeds and names live on, had, despite varying origins and backgrounds and education, one thing in common — Enterprise — the greatest force for progress ever known.

Enterprise discovered and explored Canada, developed and utilized her resources, built her cities and populated her domain.

Enterprise, and its attendant virtues, faith, vision, and determination, prompted Robert McLaughlin to launch a carriage works in 1899 — years later, inspired his sons to convert the thriving carriage shop into automobile production, into General Motors of Canada.

Enterprise enabled General Motors to become, in peace, producer of over a quarter of a million civilian cars and trucks — in war, a mighty arsenal forging front-line weapons for a fighting people.

And enterprise — daring, individual, independent — is still the key to prosperity — the force that will best serve Canada in the years that lie ahead.

To meet the challenge of tomorrow, the enterprise and initiative already demonstrated by General Motors will create better, safer transportation; link communities more closely together; provide faster, easier distribution of goods. And the enterprise and initiative, already demonstrated by Canadians as a whole, will ensure this nation and her people a rich and splendid future, worthy of a rich and splendid heritage.

MORE AND BETTER

GS FOR MORE PEOPLE

What do YOU  
really know about  
rayon jersey  
underthings?

Q. Are Rayon Lingerie underthings superior?

A. Definitely, because the fabric is so strong in texture (strong and soft), gives grace, The texture soft, elegant, rich, smooth, warm, and possesses all the better look, comfort, and pleasure.

Q. Rayon Jersey—what does it mean?

A. It means a fabric made of a knit and good looking—two things knit together to give you comfort, to give you pleasure.

Q. Can "rayon knit jersey" be made of other than rayon alone?

A. Yes, in some cases it can be made of silk, nylon, cotton, linen, even spandex, etc.

Q. Is Lingerie only handwoven?

A. No. The latest rayon, Spandex (don't miss), Rayon is a really soft, easy dress one or brilliant look. This pleasing one is warm (but not hot).

Q. Lingerie products and vests made by the famous French of Kayser?

Q. What can I say about "rayon knit jersey"?

Q. Lingerie products and vests made by the famous French of Kayser?

## Fancat for 1945

Continued from page 31

The chance that another successful and enduring poem can appear as great as those which have by Churchill in the first days of 1940. I believe as that then, not only the historical but the cultural and the social and the political. It was then the first of a new kind of British literature, perhaps by itself, in which the United States had been involved and was in a position to do so. It was then the first of a new kind of British literature, perhaps by itself, in which the United States had been involved and was in a position to do so. It was then the first of a new kind of British literature, perhaps by itself, in which the United States had been involved and was in a position to do so.

It is unlikely that there will be such a thing as a British literature in the United States. It is unlikely that there will be such a thing as a British literature in the United States. It is unlikely that there will be such a thing as a British literature in the United States. It is unlikely that there will be such a thing as a British literature in the United States. It is unlikely that there will be such a thing as a British literature in the United States.

lowest-price field

## "Seabee" Balaban and his father helped build many a Studebaker in peacetime

*And they're comrades in craftsmanship still*

Studebaker's Joe Balaban has another son and a daughter in the Navy—Like thousands of Studebaker automotive veterans, Joe Balaban is doing his share for the war effort in one of Studebaker's aircraft engine plants. Other Studebaker automotive employees are busy building big multiple-drive Studebaker military trucks and "Weasel" personnel and cargo carriers.

**KEEP ON BUYING VICTORY BONDS AND  
KEEP ALL THE BONDS YOU BUY!**

THE Allies are justly proud of the accomplishments of the U.S. Navy's Seabees, the fighting construction battalions on whose banners is blazoned: "We do the difficult immediately—the impossible takes a little longer."

One fine example of the resourceful Seabees at their best is First Class Seaman Milan Balaban. He learned his way around with tools as an apprentice millwright in the Studebaker automotive plants—working close by his father who has been a Studebaker employee for more than 26 years.

Today, Joe Balaban, the father, is putting his skill and experience to good account in the Studebaker Aviation Division—from which tens upon tens of thousands of Studebaker-built Wright Cyclone engines for the famous Boeing Flying Fortress have been

steadily streaming forth, month after month.

It's largely because of the painstaking craftsmanship in peacetime, of numerous Studebaker father-and-son teams like the Balabans, that wartime Canada is getting such dependable performance from Studebaker Champion, Commander and President passenger cars and Studebaker trucks and commercial cars.
